

critical stewardship

GUIDING PRINCIPLES

- 1 Consider social, cultural & environmental context as an integrated whole.
- 2 Determine essence or what is essential about a place and establish an interpretive narrative.
- 3 Balance intent with conserving resources to optimize design thinking.
- 4 Consider the embodied energy of each material or resource in determining value.
- 5 Identify both material and programmatic failure, and conduct a critique of performance; address inherited shortcomings.
- 6 Embrace new technologies; new and old are compatible.
- 7 Embrace creativity and design.
